

ZACHARY DIAKS

Senior Quality Engineer (QE)

Brookline, MA | 516-672-8931 | zachryandax@gmail.com

EDUCATION

Northeastern University — Boston, MA
B.S. Physics, Magna Cum Laude (May 2020)
Minors: Mathematics and Computer Science

TECHNOLOGIES

Languages: MATLAB, Python, Simulink, JavaScript, Bash, SQL
Frameworks: MUnit (MATLAB), QUnit, Playwright, Sinon, Jest, Pytest, React

WORK EXPERIENCE

MATHWORKS

Senior Quality Engineer (May 2026 – Present)

- Serve as a Quality Engineering representative in a cross-department working group aiming to redefine the standards and guidelines for agentic software development processes.
- Develop a multi-agent skill to plan, implement, and review standards-compliant tests from software specification documents and team-specific test strategies. Saves multiple hours of test planning and implementation.
- Design agentic-AI skill to automate quality retrospective reports, connecting data sources from multiple areas of the company. Anecdotes from pilot teams cite time savings of up to 8 hours per report generation.

Quality Engineer III (May 2023 – May 2026)

- Developed an internal Generative AI tool in MATLAB to automatically generate test artifacts from software specification documents, reducing manual test planning and implementation effort saving an average of one hour per test plan.
- Optimized default test selection strategy for internal build and test system by leveraging source to test mapping, saving as much as 100 hours of linear test time per job.
- Analyzed UX data to identify frequently hit and untested errors to improve both test coverage and usability.

Quality Engineer I (October 2021 – May 2023)

- Lead Quality Engineer for Sensor Fusion and Tracking Toolbox. Worked with developers to design and implement test plans for new features and led retrospectives on the quality of the product after each release.
- Contributed to an internal tool used to build test bed reports from markup in test files (MATLAB backend, React frontend, MySQL database).
- Added CI/CD pipeline for internal ticket automation tool using MATLAB, GitLab, and TeamCity.

Application Support Engineer (June 2020 – October 2021)

- Provided technical support to customers for MathWorks products in the Deployment and Test and Measurement areas (e.g. MATLAB Compiler, Database Toolbox, Data Acquisition Toolbox).

ROGERS SCIENCES | R&D Engineering Co-op (July 2019 – December 2019)

- Designed test fixtures to validate device specifications against average patient data in FDA databases to prepare for FDA approval.
- Automated device calibration tasks using C++, saving minutes of effort per calibration.

HARVARD MEDICAL SCHOOL | Neuroimaging Co-op (July 2018 – May 2019)

- Operated Transmission Electron Microscope and prepared images for 3D reconstruction using Bash/Python.
- Automated image processing tasks using Slack API, reducing manual effort from several hours to less than a minute.

DRAPER LABORATORY | *Advanced Sensors and Imaging Systems Co-op* *(July 2017 – May 2018)*

- Programmed and incorporated electronics (IMUs, precision rotary stages, and Hall effect sensors) into experimental imaging and navigation systems using MATLAB and LabVIEW.
